CHEMPIOIL DRUM STORAGE RACK

Shelf and storage system for containers 10 L/20 L x 6.

The horizontal arrangement of the containers on the shelf provides safe storage and easy dosing during decanting of oil and other liquids from the containers. Special straps for safe fastening of the containers as well as a bottom tray for clean decanting of liquids are included. The label holders attached to the storage system provide space for all the necessary information about the stored containers with oil or other liquids. The storage system is made of a robust metal rack which ensures safe, comfortable and easy assembly and dismantling.
